

**VOLUNTARY REMEDIATION PROGRAM  
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

**PROJECT SUMMARY**

<b>Site name:</b>	Marathon Bulk Plant #56
<b>Applicant Name:</b>	Marathon Ashland Petroleum, LLC
<b>Site location:</b>	2910 Connet Street Fort Wayne, IN 46802
<b>VRP Site No.:</b>	6010103
<b>Project Manager:</b>	Brent Dayharsh
<b>Date received:</b>	January 29, 2001
<b>Date completed:</b>	April 21, 2003
<b>Contaminant(s):</b>	BTEX, MTBE, SVOCs
<b>Media Addressed:</b>	Surface Soil, Subsurface Soil, Groundwater
<b>Cleanup Objectives Achieved:</b>	VRP 1996 Guidance Tier II Nonresidential
<b>Deed/Land use restrictions:</b>	The property shall not be used for residential purposes
<b>Engineering Controls:</b>	Not Applicable

**Project Summary:** Marathon Bulk Plant #56 is a petroleum bulk storage and distribution center located in Fort Wayne, Indiana. There are 5 aboveground storage tanks located on the site with a capacity of 20,000 gallons each. A spill of approximately 8100 gallons of fuel oil occurred on December 25, 1985. Following this release, fuel oil free product was recovered and monitoring wells were installed on-site for further groundwater monitoring and free product recovery. Free product was last detected in any monitoring well in December, 2000. Confirmatory soil sampling and quarterly groundwater monitoring have demonstrated that contaminant concentrations at the site meet VRP nonresidential cleanup goals.
